Challenge. Disruption. Teamwork.

Mechanical Engineer FH/HF, Design Engineer (100%)

We are a fast-growing, internationally active company.
We ensure a highly innovative presence of our brand.
We test, learn, optimize ...

...and we're looking for backup! Are you interested in an exciting
and varied position in our dynamic and open-minded technology team?

What you will do

- Product development and conception of mechanical solutions from concept study to series production in the field of measuring and testing devices
- Creative design of constructions for measuring instruments
- Innovative solution finding for new developments and further developments
- Preparation of models, parts lists and other production documents
- Interdisciplinary collaboration with experts from the fields of electronics, software and product management
- Build functional prototypes and contribute to the testing
- Interface with manufacturer to understand manufacturing constraints, ensure production quality
- Technical clarifications with suppliers and partners including production introduction
- After successful training, project management tasks can be added if required

What we expect

- Mechanical engineer FH/HF or comparable education
- Expert hands-on experience in CAD design, preferably Solid Works
- Previous project leading/management experience highly valuable
- At least 10 years industry experience in product development
- Innovativeness, creativeness and openness to new ideas and concepts
- Independent, proactive, structured and thorough way of working
- Enthusiastic team player who appreciated working in interdisciplinary teams
- Hands-on' mentality and flexible way of thinking
- Extensive hands on experience in design, prototyping and fabrication techniques
- Excellent communication skills, oral and writing, in English and German

What we offer

- A diverse, growing team of 30+ nationalities, and a global network of suppliers, partners, and customers across industries.
- A bold strategy and a winning entrepreneurial culture shaping our industry with disruptive digital innovation, proven by our double-digit revenue growth.
- A fast-paced environment with short communication paths and frequent check-ins that foster progress and learning.
- Dynamic projects delivering innovative business models and touchable products with sophisticated sensors, mobile apps, and cloud services.
- A flexible organization that builds on your strengths in challenging assignments in which you will grow as a professional.
- A new and modern spacious building and cutting-edge IT infrastructure conducive to both collaborative and individual work.
